

Three Phase Input Single Phase Output UPS Online Transformer Based UPS Smart Online double-conversion

U31 Plus Series (10,15,20,30,40KVA)

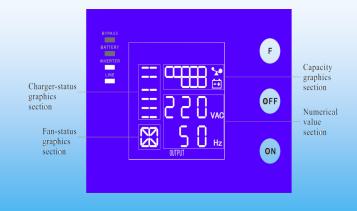

- Dalton U31 Plus for high single phase loads is aspire to introduce the latest built in galvanic isolation transformer technology for output with DSP true online double conversion UPS for protecting medium sized strong mission medical loads, medium dynamic loads, critical & IT loads so as to safeguard your valuable equipment and critical data from any interrupted power, such as surges, blackouts and lighting strikes.
- Transformer Based UPS Technology
- Accept dual-mains input
- Output Short Circuit and Overload Protection
- Maintenance Bypass Switch
- High Input Power Factor
- High charging capability: 2 A / 4 A / 6 A / 8 A / 10 A / 12 A / 14 A / 16 A selectable
- Optional SNMP Communication Port
- Output Current Limiting
- Cold Start Function
- Automatic Battery Test
- High Charge Current Capacity
- DSP technology guarantees high reliability
- 15 Years Spare parts Support

Graphical Display LCD

Dalton U31 Plus The multilingual LCD display provides direct access to the main UPS functions is fully digital signaling processor (DSP) controlled to provide quality supply, reduces the number of access and hence increases reliability and improve performance.

Simple Network Management Protocol (SNMP)

Dalton U31 Plus provide a SNMP which is a popular protocol for network management. It is used for collecting information from, and configuring, network devices, such as servers, printers, hubs, switches, and routers on an Internet Protocol (IP) network

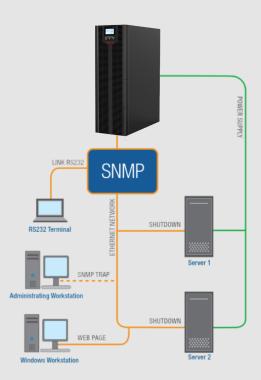

Software support most OS for remote monitor and control UPS through LAN, warning

notifications through broadcast and mobile phone, multi-shutdown PCs, and schedule

UPS self-test. This unique software provides complete power protection for computer system during power failure

Direct Connection with Ethernet Network

Built In Isolation Transformer

- True galvanic isolation transformer design for best performance with dynamic and tuff medical loads
- Excellent operating efficiency with written efficiency guarantees
- Smart Input Filters enhances generator compatibility
- Innovative product technologies that boost efficiency, reliability and lengthen battery life

Maintenance and Battery Management

Intelligent Maintenance is an essential activity in order to guarantee a safe and stable load protection. Dalton shows maximum care about this topic, providing the best service in terms of experience, instrumentation and safety level. Enables the UPS to transfer the load to utility power without interruption in the event of heavy overload or fault.

U31 Plus multiple levels of service. With package or individual service component options, our services are structured for you to choose what DTM by Dalton can do for you.
